## **THE 100-10 SURGICAL SUPPLY KIT**

A kit developed by The Norwegian Council Of Health Preparedness.

The kit is estimated to cover the needs for medical disposable equipment for approximately 100 surgical inpatients for 10 days, particularly in the post-operative phase.

The kit contains all essential medical disposables; bandages, compresses, drains, tubes, syringes, needles, catheters, infusion accessories, gloves, sutures, burn dressings, hygiene equipment, plaster of Paris and sterilization accessories.

The kit was originally designed for use in Norwegian National Health Preparedness, but is now widely used on an international basis.
